SOLUTIONS FOR KIDS IN PAIN (SKIP)

National Program for Children’s Pain Management

Provides free, online resources for families, children, and healthcare workers about children’s pain management

Various Programs

Different Resources

The first national Pediatric Pain Management standard

Solutions for Kids in Pain (SKIP) and the Health Standards Organization (HSO) are pleased to announce Canada’s first national Pediatric Pain Management standard, establishing a set of guidelines for the delivery of pain management for children from birth to 19 years. The standard provides guidance to health care organizations on how to deliver equitable and quality pain management across hospital settings!

‘Youth in Pain’ Project

Throughout this project, we collaborated with a diverse group of partners to create over 30 new tools and resources in both English and French. These tools promote safe, effective, and equitable opioid use for managing pediatric pain.
