Nursing Residency Program

Grow your confidence. Build your skills. Find your support system.

The **IWK Nurse Residency Program** is a **one-day-monthly program** that runs for nine months, that supports new graduate nurses as they transition from nursing school to professional practice. Through mentorship, professional development, and educational opportunities, the program helps nurses build confidence, strengthen their clinical skills and develop the professional relationships and knowledge they need to provide safe, high-quality care to women, children, youth and families.

SUPPORT FOR YOUR TRANSITION TO PRACTICE

Mentorship & support

Receive mentorship and support from the Transition to Practice Clinical Leader of (Development CLD), who supports you throughout your transition.

Connect with peers

Connect and learn with other new and experienced nurses from across IWK Health, share experiences, reflect on challenges and build supportive relationships.

Individualized learning

Work with your Transition to Practice CLD, and care team to develop learning plans that supports your ongoing development and progression in practice

Professional Development

Receive support in a psychological safe enviroment to build your practice as a Registered Nurse, foster resilience, and create foundations for career-long professional development.

Hands-on learning

Strengthen your foundations through ongoing education, evidence-informed practice and innovative teaching approaches, including simulation-based learning.

Your nursing career starts here.
